The downside, however, is that it cannot assure that all students understood the lesson. Each person learns through different approaches. The typical lecture setting may be an effective way for some, but others will find it difficult to grasp the material. Admiringly, there are some institutions that extend extra effort to apply the different learning methods to boost the performance of their students. This is the reason why some professors combine lectures, group works, projects, reports, and such in their syllabi. They aim to give each learner a chance to comprehend the lesson by applying it in different ways. However, as a student you may never understand the way you learn, even when professors go this extra mile. When studying for exams, it's important for every learner to self-study, but there can be more than one way to review. Your job, as a person of intellectual pursuit, is to know which learning styles you fall in to make your studies more effective. From determining your learning style to keeping a flawless timetable, all the skills you need this year are detailed on the following pages of this book, so journey on and follow the path to excellence.
