Excerpt: . chapter ii. the natural features, the natural history, and the indian period. Special Authorities; Mr. J. H. Sears of Salem, Mass., Prof. V. J. McGee of Washington, D. C. geology. byfield is a good place to take lessons in geology. Long Hill is a characteristic drumlin; that is, a long, high, smooth, unstratified hill of glacial origin. It is over a mile long, two hundred feet above the sea, and one hundred feet above the adjacent ground. It bears a silent but potent witness to the might of the ancient sheet of ice that once enveloped all the region. The great glacier towered possibly thousands of feet above it, and the hill was the deposit of the drift that was borne along in its lower portion. What was known as Rye plain when the parish was set off, or the region of Warren...
