Not illustrated. 1880 Excerpt: . . . give the notation now adopted to save writing a long list of noughts in large numbers. It consists in writing the first of the whole numbers followed by a decimal point, and then indicating that the whole number and decimal are to be multiplied by 10 as many times as may be necessary. The number of times is indicated by a small figure called the index above and after a 10. f This index gives the number of noughts in the multiplier; and as only one figure is put to the left of the decimal point in the number, the index is also the total number of noughts and figures after the first number. Thus, 8.5×10 is known at once to be 8 followed by 6 figures, the first of which is a 5 and the rest noughts. Page 49. t Thus, 103...
