Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Interpretation of Dental and Maxillary Roentgenograms The purpose of this small volume is to present to members of the medical and dental professions the data necessary for making\* an intelligent diagnosis of pathologic conditions about the teeth and jaw bones in which roentgen examination plays a part. It is hoped that a basis for this will be formed by study and comparison of the numerous normal and abnormal views shown. It has been said that the actual making of the roentgenogram is the elementary feature of roentgenology, and that those who know how to interpret roentgenograms are few in number compared with those who know how to make them. It is to interpretation rather than to technic that the writer has endeavored to call particular attention in the following pages, references to technic being\* limited to special points involved in examination of the teeth and jaw bones. A departure from the usual method of presentation lies in the fact that in this work the roentgenograms are negative reproductions; i.e., they correspond with the original negatives in that bone and hard tissues are light, and soft tissues and spaces are dark, instead of being merely prints of the negatives, in which the dark and light portions are reversed: so that in studying these illustrations there, is a near approach to natural conditions found in the original negatives. In a majority of the odontograms showing periapical pathology, the writer has been in a position to compare the pictures with the conditions found at operation, so that in these cases the interpretations are not based merely upon surmise.
