Brand New Book ***** Print on Demand *****.Excerpt from The Influence of Hemorrhage Upon Metabolism The practice of venesection, or blood-letting, is as old almost as the practice of medicine. History informs us that even as early as the time of Galen the employment of venesection was quite general. The withdrawal of blood was for many centuries looked upon as the most satisfactory remedy possessed by the practitioner, and indeed in a great number of diseases was considered to be the only means of preserving life. The mere question of the withdrawal of blood was never debated, the amount being the only question to decide, as it was almost universally taken for granted that some blood must be drawn. Galen himself employed blood-letting to the point of syncope, and his principal treatment for fever was blood-letting and the application of cold. So great was the faith in the Universal treatment, as it came to be called, that its domain of influence was expanded and came to include the realms of religion and superstition. The desire to do evil was supposedly dissipated by its magic;...
