On the other hand, the stimulus of a well-presented account, gathering up the knowledge gained from careful observation and experiment is undoubted, and in this respect most of the present work has been tested by the author and an appreciative audience of eager and inquiring young minds. The first part interprets to the young student of Botany the meaning of the many phenomena of plant life which he or she may have been studying, and represents an attempt at outlining a mental picture of the closely interdependent functions and of the adaptations observed among plants, by explaining the factors of vegetable life, whenever it is possible to do so, in terms familiarly used of human life.
