

Pattern Recognition: 31st DAGM Symposium, Jena, Germany, September 9-11, 2009, Proceedings

By -

Springer. Paperback. Book Condition: New. Paperback. 564 pages. Dimensions: 9.2in. x 6.1in. x 1.3in. In 2009, for the second time in a row, Jena hosted an extraordinary event. In 2008, Jena celebrated the 450 birthday of the Friedrich Schiller University of Jena with the motto Lichtgedanken ashes of brilliance. This year, for almost one week, Jena became the center for the pattern recognition research community of the German-speaking countries in Europe by hosting the 31 Annual Symposium of the Deutsche Arbeitsgemeinschaft für Mustererkennung (DAGM). Jena is a special place for this event for several reasons. Firstly, it is the first time that the university of Jena has been selected to host this conference, and it is an opportunity to present the city of Jena as offering a fascinating combination of historic sites, an intellectual past, a delightful countryside, and innovative, international research and industry within Thuringia. Second, the conference takes place in an environment that has been heavily influenced by optics research and industry for more than 150 years. Third, in several schools and departments at the University of Jena, research institutions and companies in the fields of pattern recognition, 3D computer vision, and machine learning play an important role. The university's involvement includes such diverse activities as industrial inspection, medical image processing and analysis, remote...

Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
